

# EPOXY COATING for art gallery

△ About 400m<sup>2</sup> of a.b.e.'s abecote 400 Hi-build flooring system was applied to the atmospherically lit Misael SA Art & Design centre in the Cape Town CBD.

A specialised epoxy floor coating supplied by a.b.e. Construction Chemicals was used for new floors at the Misael SA Art & Design Centre in Cape Town.

Peet du Preez, technical sales consultant for a.b.e. in the Western Cape, says about 400m<sup>2</sup> of 1mm thick abecote 400 Hi-build coating was applied to the floor of this lifestyle centre in the Cape Town CBD. The applicator was Industrial Flooring Systems (IFS).

a.b.e.'s abecote 400 Hi-build is an economical, four-component solvent-free epoxy flooring system comprising a clear resin and hardener, pre-packed filler and ready-to-use pigment paste.

The coating is suitable for a wide variety of applications including ablution blocks, walkways, food processing plants, hospitals and schools. It can also be used as a binder for abrasive grit to yield non-slip floor finishes.

Some of the major features and benefits of abecote 400 Hi-build include its strong protective qualities; good resistance to chemicals; reduced maintenance; wide range of colours; seamless and hygienic; and it can be applied to a variety of surfaces.

Misael SA Art & Design is primarily an art gallery but is also used as a venue for live music concerts and as a "trendy hangout space" for Capetonians. The facility was established by businessman Ayanda Holo.
