a.b.e.® Construction Chemicals

abe.® peel and stick abe.® proof liquid membrane system

HOUSE PLATTEKLOOF, WATERPROOFING BALCONIES

PROJECT LOCATION

4 Blombos Crescent, Platteklouf, Cape Town

SIZE OF PROJECT

95 m²

NATURE OF PROJECT

Waterproofing carried out on two existing balconies. 27 Year old house has leaked since construction. Tiles on balconies removed, door thresholds were addressed using **abe.® peel and stick membrane** to be dressed up on the inside of the frame. **abe.® peel and stick membrane** is a universal, self-adhesive waterproofing membrane ideal for counterflashings between walls and roof, under windowsills, parapets and skylights.

The flat surfaces were coated with the **abe.® proof**

liquid membrane primer and then the **abe.® proof liquid membrane**. This single pack, solvent borne, low VOC, rubberised, liquid applied waterproofing membrane is highly elastic and durable, requiring low maintenance and is fast curing, UV stable, and can be tiled.

OTHER PRODUCTS USED

Dowsil™ 813C

CONTRACTOR DETAILS

Reno Construction

PROJECT START & END DATES

February - March 2019

a.b.e.® EMPLOYEE INVOLVED

Brett Papayanni and Christopher Norbury
