abe.®cote 441

CO-OP, FLOOR REFURBISHMENT

PROJECT LOCATION

Porterville, Western Cape

SIZE OF PROJECT

1500 m²

NATURE OF PROJECT FLOORING: COATINGS

abe.®cote 441 is a protective and decorative high gloss ployurethane enamel for steel, concrete and timber. Finish coating on various flooring systems. The clear material is suitable for bar counters and similar applications. Advantages include non-toxic when dry, salt spray resistance (passes 1 000 hours), weather resistance – does not chalk, white does not yellow. Excellent water resistance, resists aliphatic solvents, xylol, alcohol. Does not taint water.
