

REPROPLAST

"WE STRONGLY BELIEVES THAT ALL POLYPROPYLENE WASTE MUST BE DIVERTED FROM LANDFILLS AND OCEANS"

1

POST CONSUMER & INDUSTRIAL WASTE COLLECTED:

Reproplast, in proud partnership with ABE & others suppliers, collects & receives polypropylene waste from numerous sources in different formats and can accept more than 30,000kg per day

2

WASTE SORTED AND SHREDDED:

Reproplast sorts and down sizes the bulk polypropylene waste through a mechanical shredding process to prepare the materials cleaning and pelletizing.

3

RECYCLED POLYMER UPCYCLED AND COMPOUNDED:

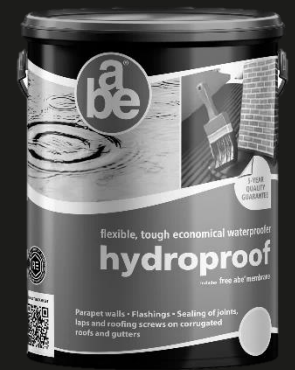

In the Reproplast laboratory, recycled formulations are tested in accordance with ISO standards

4

RECYCLED POLYMER CREATED:

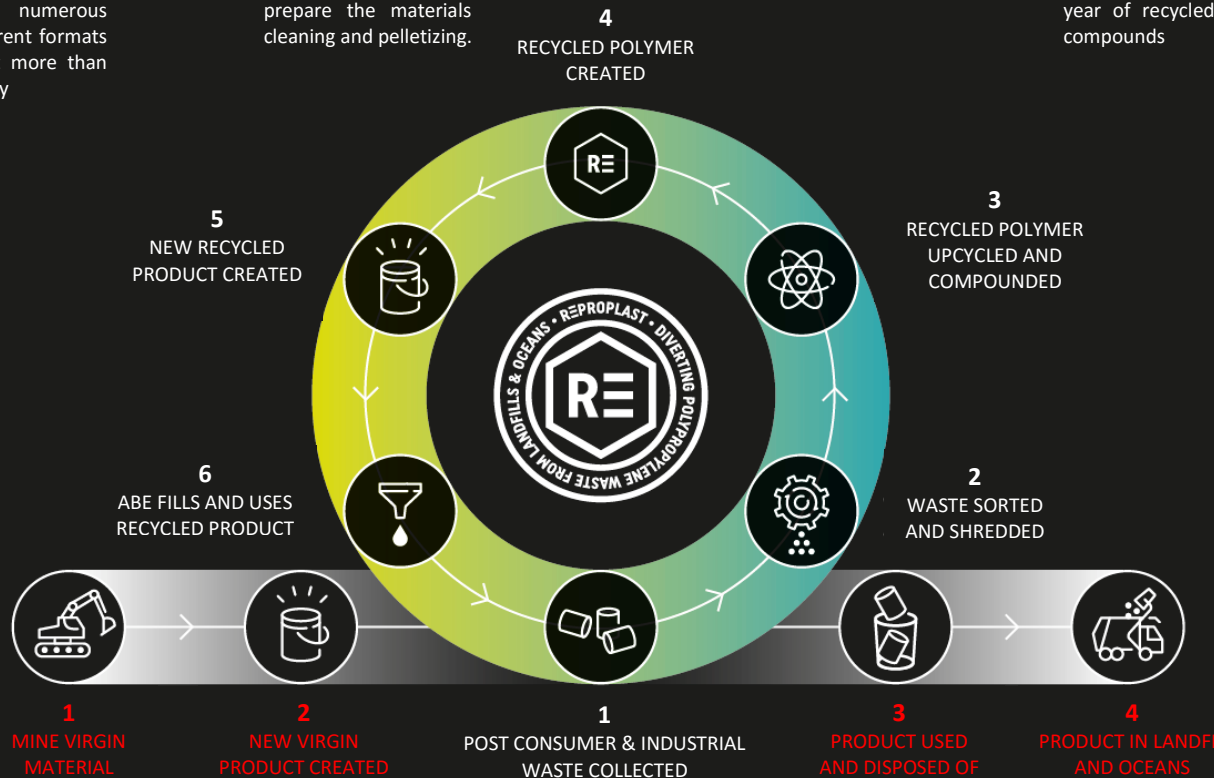

The latest European compounding equipment is used at Reporplast to make more than 12,000 TONS a year of recycled pelletized compounds

5

NEW RECYCLED PRODUCT CREATED:

Partners like ABE choose to make a difference and use recycled products made at Reproplast to assist in creating demand for polypropylene waste.

DIVERTED:

TONS of polypropylene waste successfully diverted
