flintkote 3 dura.®kol G HM

WESBANK CAR TERMINAL RAMP, FLOORING

PROJECT LOCATION

East London Harbour, Eastern Cape

SIZE OF PROJECT

500 m²

NATURE OF PROJECT

Offices are housed under last level of East London MBSA car Terminal ramp. Constant flow of traffic has caused cracks and movement. Water penetrates cracks and drips in offices containing computers with valuable information.

Cracks were cut out with angle grinders and secured with **dura.®kol G HM** used for sealing expansion joints, stress relief joints and movement joints.

High traffic ramp was then sealed over with 3 x heavy coats of **flintkote 3**, a general purpose bituminous coating, vapor barrier and flooring

system binder. Waterproof binder for mastic flooring which is easily repairable and potable water containment.

OTHER PRODUCTS USED

dura.®cord
Silica Sand

CONTRACTOR DETAILS

SMME Multiware

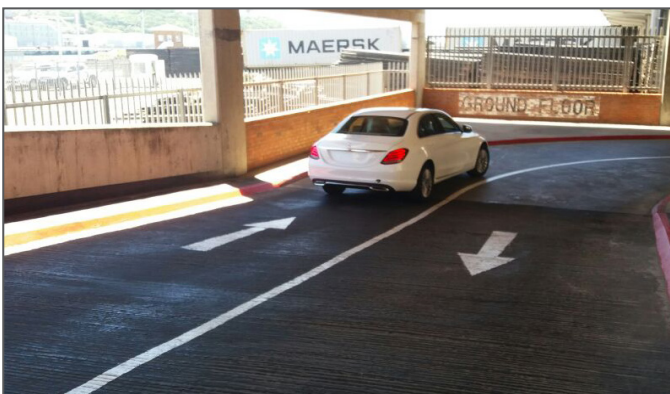

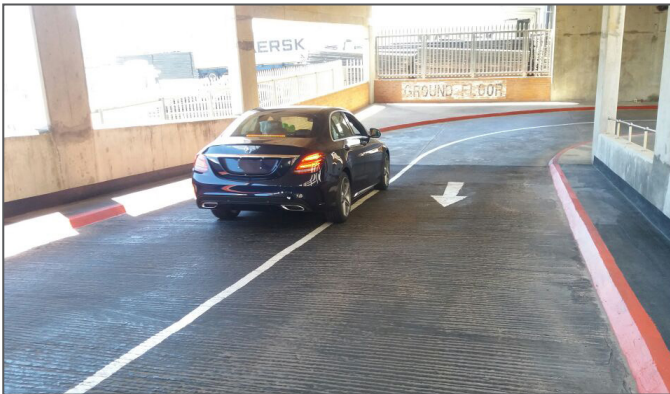

PROJECT START & END DATES

December 2017 - January 2018

a.b.e.® EMPLOYEE INVOLVED

Nick Pike
