a.b.e.® Construction Chemicals

dura.®flex abe® ecofelt

NOVA APARTMENTS, WATERPROOFING

PROJECT LOCATION

Nairobi, Kenya

SIZE OF PROJECT

5 500 m²

NATURE OF PROJECT

dura.®flex with **abe®ecofelt membrane** reinforcement was used for waterproofing of the swimming pool, podium, balconies and bathrooms.

dura.®flex is a ready-to-use flexible slurry based on a special synthetic resin dispersion and a blend of selected cements, mixed with carefully selected graded aggregates. **dura.®flex** is non-toxic, self-curing, and effective on both the negative or positive side (positive side waterproofing applies to sides with direct exposure to water, while negative side waterproofing applies to the opposite or interior side from which water occurs).

The product has high bonding strength, and offers strong resistance to abrasion as well as chloride ion penetration.

OTHER PRODUCTS USED

abe® ecofelt membrane
