abe® flooring resin

SHOPRITE DC, FLOOR

PROJECT LOCATION

Epping, Cape Town

SIZE OF PROJECT

16 500 m²

NATURE OF PROJECT

Flooring for distribution centre. abe® flooring resin epoxy system is a solvent free, clear, two component, low viscosity epoxy resin system which is cycloaliphatic amine cured (clear light colour). Further advantages include a proven system with a universal formulation, reduced moisture and carbon dioxide sensitivity, cures well down to +10°C, easily applied, good chemical resistance with less sensitive against humidity and low viscosity.
