TURBINE BOUTIQUE HOTEL & SPA, FLOOR REVAMP

PROJECT LOCATION

Thesen Island, Knysna

SIZE OF PROJECT

450 m²

NATURE OF PROJECT FLOORING: SCREEDS

The old cementitious floor covering had cracks and looked dull. Turbine Boutique wanted a floor that will create a modern architectural feel and enhances the overall industrial look.

abe.®flo HPU is a four component polyurethane self-smoothing topping, applied 2 mm thick.

abe.®flo HPU provides a heavy duty, thermally shock resistant, hard wearing floor finish with exceptional chemical resistance. Seamless and hygienic finish, no crevices where dirt and bacteria can collect. Easy to clean and sterilise, low maintenance requirement and a matt finish.

OTHER PRODUCTS USED

abe.®cote 337 WD (primer)
epidermix 314 (repair mortar)

CONTRACTOR DETAILS

Paul Basson, Global Theme Design

PROJECT START & END DATES

4 - 26 June 2018

a.b.e.® EMPLOYEE INVOLVED

Alta Diedericks / Antoinette Pienaar
