dura.rep GT-MCI

OMNIA, TANK BASES

PROJECT LOCATION

Fertilizer plant, Sasolburg

SIZE OF PROJECT

1800 m²

NATURE OF PROJECT

Concrete repair to tank bases. The main product used was **dura.rep GT-MCI**, a polymer modified, structural repair mortar containing a migrating corrosion inhibitor (MCI). **dura.rep GT-MCI**'s low permeability resists carbonation and chloride attack and has been formulated for use in hot climatic conditions such as in the Sasolburg summers. The product's high build eliminates the use of multiple applications.

OTHER PRODUCTS USED/SPECIFIED

- epidermix 345
- epidermix 372
- duraflex®

CONTRACTOR DETAILS

Pumachem

PROJECT START & END DATES

April - May 2016

a.b.e.® EMPLOYEE INVOLVED

Steff Dalton
