

SAINT-GOBAIN

CHRYSO® Béton Ciré

DECORATIVE CONCRETE

Residential FLOOR REFURBISHMENT

PROJECT LOCATION

Glenn Garrif, East London, Eastern Cape

SIZE OF PROJECT

140 m²

NATURE OF PROJECT

Renovating flooring for residential homes gives the client a contemporary and elegant appearance that offers longevity and requires little upkeep. Being a seaside home a warm and quiet floor can significantly enhance the overall comfort and atmosphere of a living space.

Portland cement, minerals, and additives are all included in the combination of dry powders, which is mixed with **Chryso Polymer 11**. The product, which may be used to smooth floors with blowholes or surface imperfections, can be applied by spray or trowel to get the required finish. It can also quickly cover huge surfaces. A pigment can be added to the **Chryso® Béton Ciré Finishing**. The system is appropriate for use over existing surfaces as well as new floors and walls, both indoors and outdoors.

OTHER PRODUCTS USED

Chryso® Concrete Primer | abeseal finisol | abecote® tough polyurethane paint (clear)
