SUBSTRATE LEVELLING

SAINT-GOBAIN

abescreed SLCP

**RAPID-SETTING
SELF-LEVELLING SCREED**

PROJECT LOCATION
Stirling, East London, Eastern Cape

SIZE OF PROJECT
60 m²

NATURE OF PROJECT
abescreed SLCP is a specialized flooring product designed for specific applications where rapid setting and levelling of floors are essential. It's ideal for both refurbishment projects and new construction.

This product is a type of cement-based screed, which is typically used to level and smooth out uneven or rough surfaces. It is available in a single-pack, pre-mixed and ready for use.

abescreed SLCP can be applied using two main methods: Hand applied by trowel in thicknesses ranging from 0 to 20 mm. Pumped onto the floor in thicknesses ranging from 4 to 20 mm, and an average thickness of 8 mm on a reasonably level base can be expected. It can be used for office buildings, dwellings (homes), shops, public buildings, schools, hospitals, and airports.

OTHER PRODUCTS USED
duragrout® (non-shrink grout)
abepime SLC acrylic primer
