## CEMENT CONCRETE FINISH

SAINT-GOBAIN

### durarep FC

durarep FC is ideal for fairing of concrete or masonry surfaces to receive protective or decorative coatings. highly compatible with and bonds extremely well to concrete, masonry, and other durarep FC mortars and can be over-coated with **duracote** coatings.

#### PROJECT LOCATION

Waterfall Village Estate, Gauteng

#### SIZE OF PROJECT

N/A

#### NATURE OF PROJECT - CEED TO CREATE A CEMENT/CONCRETE FINISH

**durarep FC** for the inside fire place, outside balcony and garage cement architrave sections a single component, polymer modified cementitious fairing coat was used.

**durarep FC** only requires the addition of a minimal amount of clean water. Its unique formulation provides a fair-faced finish to concrete and masonry whether used as a fairing or to close blowholes prior to applying protective decorative coatings.

**durarep FC** is used as a thin film coating to concrete and masonry surfaces which are not trafficked. It can be applied from feather edge to 3 mm in thickness for other applications such as a scraper coat and filling minor indentations.
