

SOLUTIONS TRAINING AND ON-SITE PROJECT SUPPORT

Saint-Gobain's Training and Support Initiatives:

1. On-site Training and Demonstrations

Saint-Gobain offers on-site training and demonstrations for projects at the outset, ensuring professionals have practical experience with the products and systems methodology.

2. Technical Assistance

Saint-Gobain's experienced technical sales teams offer assistance at any stage of a project to ensure quality and success, which could also include monitoring to offer product warranties as specified. They could also provide advice on troubleshooting project queries and proposing solutions.

3. Saint-Gobain Solutions Academy

This academy focuses on enhancing on-site training or courses at the academy's facilities to support in-house team training (Engineers / Architects), contractor training, and practical solution installation training.

Saint-Gobain provides extensive product/solution training and on-site project support to enhance the knowledge and skills of construction professionals and contractors.

Their offerings include training programs, both on-site and at our various facilities, focusing on product systems and safety guidelines, as well as support for project execution. This support helps improve project efficiency, quality, and safety on construction sites together with suitable product/solution selection, correct application and optimum system performance.

4. Saint-Gobain CPD presentations, Lunch & Learns or Webinars

These sessions provide discussions with professionals about specific solutions and topics relevant to the professionals in the building and construction sector.

5. Technical Specification Support

Saint-Gobain offers a support team of qualified architects and engineers who are able to take your project plan and develop a project pack specifying a complete system solution. They can also design bespoke details and provide BIM objects to support the professional teams.

6. Approved Applicator Network

Saint-Gobain, where applicable, has a network of approved specialized applicators who are skilled professionals in the **Saint-Gobain** product solution and applications.

Benefits of Saint-Gobain's Training and Support Initiatives:

- **Improved product knowledge**

Training helps professionals understand the features and benefits of **Saint-Gobain's** products and solutions, enabling them to make informed decisions.

- **Technical library**

Access to solution details like ceiling and drywalling or insulation, technical literature (datasheets, methodologies, brochures, Revit/Autocad/BIM drawings); and application videos.

- **Enhanced safety**

Saint-Gobain's safety guidelines and training contribute to a safer working environment when installing and applying our solutions.

- **Increased efficiency**

Training and support can streamline processes and improve the overall efficiency of construction projects, reducing wastage, and optimizing procurement.

- **Quality assurance**

By providing expert guidance and support, **Saint-Gobain** helps ensure that its products are installed correctly and meet high-performing standards.

- **Local engagement and skills transfer**

Saint-Gobain's initiatives contribute to local economic development and skills transfer within the communities they operate in.

- **Customer experience and satisfaction**

The commitment to offer product training, technical advice and project support ensures that **Saint-Gobain** customers and contractors are confident in the application of its solutions and experience the full technical performance which is required to achieve successful projects.

Terms & Conditions:

Saint-Gobain product training and technical support is dependent on the availability of our support teams and as such, Saint-Gobain reserves the right to manage requests for product training and technical support.

Saint-Gobain does not accept any liability, either directly or indirectly, arising from the application of its products, which is not in line with any advice, specification, recommendation or information provided by Saint-Gobain and the contractor and/or applicator hereby indemnifies Saint-Gobain against any and all claims arising from such application.
